## Life on the Vine

In this series we hope to explore how Christians become more human, and are shaped more into the image of God, as the fruit of the Spirit is developed in their lives. As much as cultivating the fruit of the Spirit is something that needs to be done individually in every Christian's life, the single most important venue for this to take place in is one's local church where one can practice living out the fruit of the Spirit in relation to God and others. We recognize that there can be barriers to growth and discipleship in our current culture and we want to help people identify them. We are framing this series around the book: [Life on the Vine by Phillip Kenneson](#). A few copies are available through the church office: [woodynookcrc@gmail.com](mailto:woodynookcrc@gmail.com)
